CATALOG NO. 77

To Our Customers:

This catalog has been prepared to give you some idea of the different designs of leather tools and embossing rolls we manufacture.

From years of experience these tools are hand made from materials best suited for the job they are intended to do. Embossing rolls are made of steel and case hardened to help prevent damage from rough handling.

We are equipped to make almost any type of tool or roll for leather-craft, either regular or special. We will submit price and approximate delivery date on request of special tools or embossing rolls not shown in this catalog. When inquiring for estimates or ordering embossing rolls always give inside and outside diameter also width and keyway size.
